

Services and support overview

Eaton Single Phase UPS Services

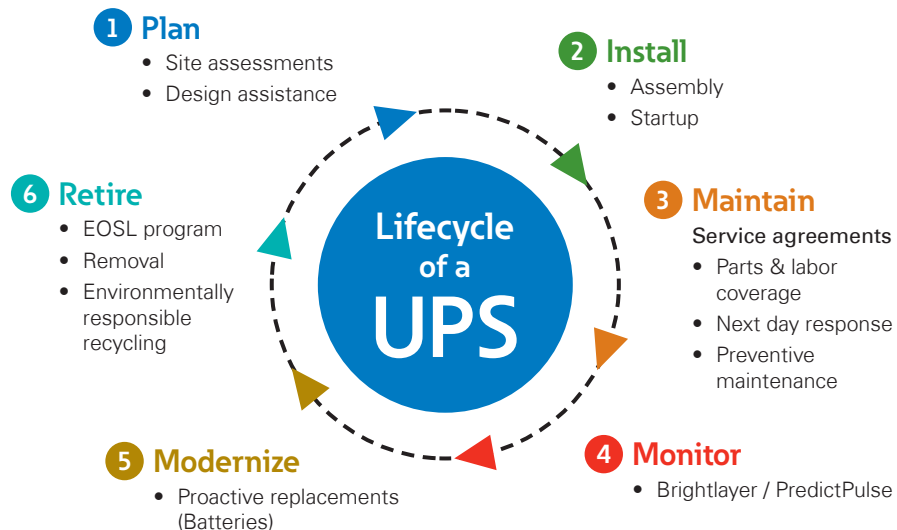

Powering Business Worldwide

Eaton Single Phase UPS Services

Purchasing an uninterruptible power supply (UPS), however big or small, is an investment in your business or organization. Here's everything you need to know about the service and support we offer so you can make the most of your UPS for many years to come.

The old adage "If it isn't broken, don't fix it," may be feasible in some circumstances, but applying it to the maintenance of a UPS can have devastating consequences. Why? Because you rely on your UPS to deliver continuous power without disruption. Proper service is critical to ensuring optimal performance while also minimizing the risks of downtime and extending the life of your UPS. Eaton's single phase UPS service offerings have you covered for the lifecycle of the UPS, from planning to retiring the equipment.

Why should you invest in proper maintenance of your UPS?

- ✓ Based on Eaton experience, more than 25% of preventive maintenance visits result in corrective actions or upgrades.
- ✓ Studies show that UPS's receiving routine preventative maintenance are more reliable than UPSs receiving no preventative maintenance.
- ✓ Time and material repair costs can be expensive.
- ✓ Non-contracted response times can be in excess of five days.

Why choose Eaton?

Deep support structure

A key component of any service plan is the peace of mind knowing Eaton will be there when you need it, regardless of the time of day or issue. In addition to providing highly trained technicians, Eaton contracted customers also have access to a host of additional resources, including:

- **Dedicated team of professionals**

We offer you round-the-clock access to our power experts.

- **Deep Technical Knowledge**

Our technical support teams have expertise in power, electrical engineering, software and connectivity, batteries, UPSs, and related products.

- **Service delivery**

Contracted customers receive Eaton's priority scheduling for emergency calls and other services.

Highly skilled technicians

A major differentiator for Eaton Service is our extensive network of factory-trained field technicians across the U.S.

Our technicians receive ongoing product training and certification. They also have constant exposure to Eaton UPS products and legacy brands, including Powerware, Exide Electronics, International Power Machines (IPM), Best Power, Deltec, Lortec and Fiskars. Because of their familiarity with these systems, Eaton field technicians deliver advanced troubleshooting and reduced downtime.

Service offerings

We offer a full suite of services for any customer need, including:

- Advanced depot exchange plans
- On-site plans
- Start-up and assembly
- Preventative maintenance
- Emergency time and material services
