Eaton Tripp Lite series SmartPro UPS, 2U rack/tower, TAA compliant

Enhanced performance and TAA compliance for government contracts

The refreshed Tripp Lite series SmartPro UPS family now includes models that comply with the federal Trade Agreements Act (TAA). These TAA-compliant UPS systems are eligible for General Services Administration (GSA) Schedule contracts, making them an option for government and military agencies and contractors.

Use these line-interactive UPS systems for protecting distributed IT equipment in network closets, server rooms and edge computing sites.

Power and protect IT equipment

Enhanced power for larger equipment loads
A unity power factor (1.0) enables the UPS to deliver the most watts possible at each power rating, allowing support of more equipment like servers, switches, VoIP phone systems and professional audio/video computer systems.

Effective power protection
The UPS provides pure sine wave AC output to connected equipment.

- Automatic voltage regulation (AVR) corrects abnormal voltages without switching to battery, keeping the UPS fully charged.
- Automatic restart when AC input power is restored after an outage reduces the need for onsite visits.

Reliable battery backup to prevent downtime
In the event of a power outage, switchover from line to battery power happens within milliseconds.

- User-replaceable, hot-swappable VRLA internal batteries outlast brief outages and permit graceful system shutdown during longer blackouts.
- Extend runtime by adding up to four external battery packs (sold separately).

Easily monitor and manage UPS operation

User-friendly local monitoring and control
Status LEDs and a menu-driven LCD make it easier to identify alarms and faults. The control panel rotates to accommodate horizontal or vertical UPS installation.

Advanced remote monitoring
An optional network card (WEBCARDLXE) provides SNMP-based UPS management and access to control features not available through the LCD. Free downloadable PowerAlert software supports remote monitoring and control.

- USB and RS-232 serial ports provide additional communication options. (Cables are included.)
- RPO/ROO port allows remote shutdown or restart of connected equipment.
- Programmable outlet banks can be controlled independently.

TAA compliance

The UPS is eligible for GSA Schedule and other federal procurement contracts.

Mount the UPS in a rack or use the included tower stands for vertical placement.

Back panel overview (SMART2200RXLTAA, SMART3000RXLTAA)

Model SMART2200RXLTAA shown (SMART3000RXLTAA has 3 output circuit breakers.)

1 Status indicators
LEDs provide power, battery and alarm status at a glance.

2 Menu-driven LCD

3 Control buttons
Navigate on-screen menus with escape, up, down, enter and on/off buttons.

4 Rack mounting brackets (removable)
UPS mounts in 19-inch 4-post racks. Tower stands are included for vertical deployment.

5 Input power cord with plug

6 Network card slot
Slot accepts WEBCARDLXE network management card.

7 RPO/ROO connector

8 External battery pack detection port

9 External battery pack connector

10 Relay output contact

11 USB communication port

12 RS-232 (DB9) serial communication port

13 Ground screw

14 Primary group outlets

15 Group 1 programmable outlets

16 Group 2 programmable outlets

Specifications

Catalog number	Rating (VA/watts)	Internal runtime* (min.), Full/half load	Plus 1 external battery pack* (min.), Full/half load	Total rack size	Outlets	Input connection	Dimensions (H x W x D), in.	Net weight, lb.
120V, 50/60 Hz rack/tower UPS with network card slot
