

Reseller Partners with Tripp Lite to Protect a Louisiana School District

SUMMARY

Customer

Pelican Computer is a technological solutions provider headquartered in Harahan, Louisiana who provides services for educational, government, small business and corporate environments.

Goal

Help a large school district in the Louisiana area protect, organize and secure the servers, switches, DVRs and cameras housed in 80 separate installations.

Solution

SmartRack® Wall-Mount Rack Enclosure Cabinets:

- SRW12US
- SRW12US33

SmartOnline® On-Line Double-Conversion UPS Systems:

- SU1000RTXLCD2U
- SU1500RTXL2UA

External Battery Packs:

- BP48V24-2U
- BP24V28-2U

Results

Delivery and installation of a complete power protection and equipment safety solution for integration into the school district's existing IT infrastructure.

“Partnering with Tripp Lite was a great idea... now IT staff can rest easy in the knowledge that their equipment is safe from unauthorized access and that UPS systems are providing power protection 24/7.”

—Jim Krause
Tech Liaison for Pelican Computer

Customer

Pelican Computer is a Louisiana-based reseller who provides technological solutions for educational, government, small business and corporate environments.

Goal

A large school district in the Louisiana area enlisted the help of Pelican Computer to protect, organize and secure the valuable electronic equipment in 80 separate installations, each of which houses thousands of dollars worth of servers, switches, DVRs and cameras. This district is comprised of elementary, middle and high schools. Jim Krause, Tech Liaison for Pelican Computer, needed to find a cost-effective solution, not only to protect and keep equipment running during power outages, surges and brownouts, but also to keep equipment safe in locations with no IT staff on site and no dedicated server room or wiring closet.

After researching his options and reaching out to manufacturers, Jim decided to partner with Tripp Lite. “Tripp Lite’s tech support was very helpful and easy to deal with,” Jim said. “They got me the specs I needed to choose the right wall-mount racks and UPS systems to house and protect the district’s equipment.”

Solution

Tripp Lite [SRW12US](#) and [SRW12US33](#) Wall-Mount Rack Enclosure Cabinets

- Keep equipment organized, secure and off the floor
- Offer extended depths to accommodate servers (SRW12US33)
- 200-lb load capacities
- Locking, reversible front doors and locking, removable side panels
- Fully assembled for quick and easy installation

SmartOnline® UPS Systems

[BP48V24-2U](#) and [BP24V28-2U](#) External Battery Packs

- Protect servers from the harmful effects of blackouts, brownouts, overvoltages and line noise

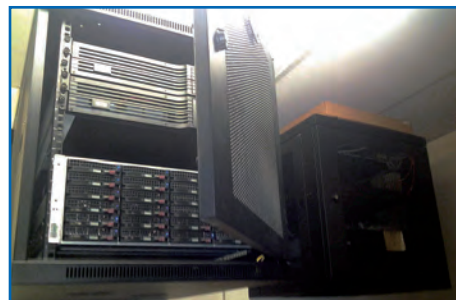

- Provide battery backup power to ensure continued operation of mission-critical equipment, enable data saves and facilitate orderly system shutdown

- Enable battery backup capacity to be increased as needed with additional external battery packs

- Ensure complete power network management and control with communications ports and included PowerAlert® software

Results

With the help of Tripp Lite UPS Systems and Wall-Mount Rack Enclosures, Pelican Computer was able to prepare this large Louisiana-area school district for any power related problems that might arise. District administration will no longer have to worry about the security of their valuable electronics, and when power problems strike their equipment will be protected.

“Partnering with Tripp Lite was a great idea,” said Jim Krause. “They provided me with all the info I needed to seal the deal and worked with me throughout the entire installation. Through Tripp Lite, I was able to find wall-mount racks that were deep enough to house the district’s servers. Now IT staff can rest easy in the knowledge that their equipment is safe from unauthorized access and that UPS systems are providing power protection 24/7.”
