

Powering and Connecting Your World

NEW PRODUCT ANNOUNCEMENT

Surge Protector & Power Strips for Home/Office

Protect It!® Surge Protector and Power Strips Add Outlets to a Workspace

Protect It! products distribute power and protect against power overloads.

Perfect for:

Offices, workshops and other spaces with multiple AC-powered devices.

Tripp Lite's new Protect It!® surge protector and power strips distribute 230V power safely and reliably to electronics, appliances, power tools and other electrical equipment. By powering multiple devices from a single AC source, they allow you to operate more equipment where wall outlets are scarce, hidden behind desks or otherwise difficult to reach.

Designed to fit into a variety of workspace layouts, these products will help you organise your office to best accommodate your workflow, and will protect equipment against power overloads.

Key Benefits

POWER DISTRIBUTION

- Multiple BS1363A outlets let you distribute power to as many as six devices from a single AC power source.
- PS4B18USBW model provides dual USB-A ports for charging mobile devices.

DEVICE PROTECTION

- 13A circuit breaker shuts down outlets in case of a power overload to protect connected equipment.
- Surge protector is rated to 250 joules to protect connected equipment against power surges and spikes.
- On/Off switch on select models provides one-touch control over all connected devices.
- Diagnostic LED on select models indicates whether power is passing through the surge protector or strip.

CONVENIENT PLACEMENT OPTIONS

- Up to 3 m cord length provides a wider range of placement options away from the AC outlet.
- Mounting slots help attach surge protector and power strips to walls, workbenches and the underside of desks.
- Direct plug-in PS1B model adds outlets with a minimal footprint for tight spaces.

DURABLE DESIGN

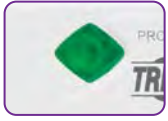

- Strong plastic housing withstands the wear and tear of every day use.

Feature Focus

A BS1363A Outlets

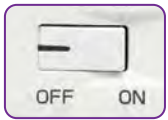

BS1363A (British) outlets distribute power to as many as 6 devices.

B Surge Protection

Surge LED verifies protection against powerful surges and spikes.

C One-Touch Control

LED On/Off rocker switch controls connected devices and easily resets the 13A circuit breaker.

D Device Charging

Dual USB-A ports provide 5V/2.4A of charging power.

E Energy Conservation

Individually switched outlets save energy and money.

F LED Indicator

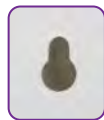

LED light verifies that the strip is receiving power.

Additional Features

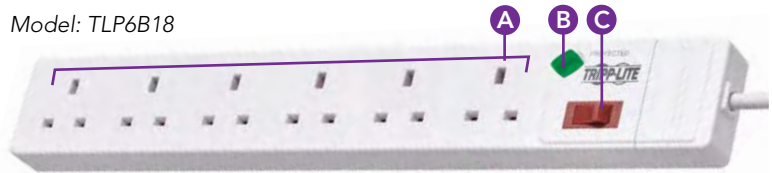

BS1363A plug for UK-style outlets.

Rear mounting slots for convenient placement.
