Surge Protectors and Power Strips

Power and charge electronics in professional environments

Safe-IT™ PRODUCTS

Designed to unite form and function, Safe-IT surge protectors and power strips are suitable for powering and charging electronics in professional environments.

Perfect for:
Offices, lobbies, conference rooms and other shared spaces where appearances matter.

Safe-IT professional-grade surge protectors and power strips combine a stylish design with convenient access to power and charging for electronic devices. The surge protectors safeguard devices connected to AC outlets from the damaging effects of power surges, spikes and line noise.

As part of the Safe-IT family of products, these power solutions have antimicrobial properties to help resist the growth of bacteria, viruses, fungi, mold and mildew. They can help provide peace of mind in environments where multiple users frequently plug in devices.

Key benefits

STYLISH DESIGN

- These surge protectors and power strips are designed to be appropriate for any space, from home offices to high-end hotel lobbies.

RELIABLE POWER DISTRIBUTION

- NEMA 5-15R outlets distribute power to as many as six devices using only one AC wall outlet.
- Surge-protected AC outlets safeguard devices from the damaging effects of power surges, spikes and line noise.

CONVENIENT DEVICE CHARGING

- Most models feature USB charging ports to conveniently keep smartphones, tablets and other mobile devices ready for use.
- USB ports eliminate the need for an AC adapter for charging cords, leaving outlets available for AC equipment.
- Qi wireless charging options on the desktop charger, TLM210CAM, and the mobile tower, TLM610CPAM, reduce cord clutter.

DIVERSE FORM FACTORS

- In-desk models offer easy access to power and charging ports. TLP12POAM is flush with the desktop, and PS22POPAM has a pop-up design. PS222DATAM stays recessed in the desktop.
- Strip model, TLP610COILAM, has a 10 ft. power cord with a coiled design to take up less space.
- Desktop model, TLM210CAM, has outlets, charging ports and wireless charging pads on two sides, making it ideal for shared spaces.
- Mobile tower model, TLM610CPAM, has outlets, charging ports and wireless charging pockets on three sides. Use with or without the included swivel casters. Heavy-duty steel base has mounting holes and a Nano slot to accept a security lock (not included).

ANTIMICROBIAL PROTECTION

- Antimicrobial protection aids in resisting the growth of bacteria, viruses, fungi, mold and mildew.

Surge Protector Feature Focus

A Surge-Protected AC Outlet(s)

AC 120V 60Hz

B USB-A Charging Ports

DC 5V 4.5A

C USB-C Charging Port

USB-C 60W MAX

D Wireless Charging Pad

E Lighted On/Off Switch

The switch confirms power status and provides one-touch control over connected equipment.

OFF | RESET

F Wireless Charging Pocket

Three pockets charge smartphones without cable clutter.

G Input Power Plug

H Cord Wrap

Power cord stays out of the way during movement.

I Swivel Casters

**J** Kensington NanoSaver Lock Slot

The slot accepts a compatible security lock (not included).

Antimicrobial Protection

Antimicrobial protection aids in resisting the growth of bacteria, viruses, fungi, mold and mildew.

A AC 125V 15A   **B** DC 5V 4.2A MAX
