

# Understanding Part Number Prefixes for Connectivity Products

Tripp Lite uses an alphanumeric system to assign part numbers for cables and connectivity products.

The **Part Number Prefix** can help you quickly find the products you're looking for:

Example: **N001-003-BL**

The first letter indicates the product **Category**.  
**N** = Network Cables

The numbers or letters that follow the Category letter indicate the **Type of Product**.  
**001** = Cat5e Snagless Cables

For most cables, the numbers that follow the Part Number Prefix indicate the cable's length.  
**003** = 3 feet

For most cables, the letters that follow the Length Indicator specify the cable's color.  
**BL** = Blue

Common Color Abbreviations:

- BK** = Black
- BL** = Blue
- GN** = Green
- GY** = Gray
- OR** = Orange
- RD** = Red
- WH** = White
- YW** = Yellow
