

Hospital-Grade Extension Cords

Get Power Where You Need It Most

Model: P022-015-GY-HG

The Centers for Medicare and Medicaid Services (CMS) has made an important change: hospital-grade extension cords are now approved for use in clinics, hospitals, long-term care facilities and other healthcare entities.

Tripp Lite’s hospital-grade extension cords are ideal as replacements for old or lost cords, or overly short or long cords, providing more options for equipment placement when connecting to power outlets. The hospital-grade power cords meet stringent standards to help protect patients and staff from shock hazards. All models have a lifetime warranty.

Key Features

- Safe, reliable power: all cords are tested to ANSI/UL 62 and 817 and CAN/CSA C22.2 no. 21 and 42
- The NEMA 5-15P HG plugs and 5-15R HG receptacles feature green dots and are clearly marked “Hospital Grade” to provide assurance these cords meet hospital-grade standards
- Gray SJT jacket and fully molded connectors provide durability and long service life
