

**THE ONLY SOLUTION
FOR SAFE USB CHARGING IN HOSPITALS**

The First USB Wall Charger Compliant with UL 60601-1 for Patient-Care Vicinities

Compact size is easy to tote and plugs into tight spaces

Tripp Lite's U280-001-W2-HG is the first medical-grade USB wall charger certified safe for patient-care vicinities. This new solution is compliant with UL 60601-1 standards, making it currently the only USB charger on the market safe for use in all areas of a hospital, clinic or other medical facility.

This USB charger is ideal for patient, guest or staff use. It features one USB Type-A port with 2.5A of power for fast, efficient charging of smartphones, tablets, MP3 players or USB devices used in healthcare applications. It is compact and can be installed in patient rooms, nursing stations and treatment rooms, for visitor and patient use.

Key Features

- UL 60601-1 listed and compliant for use in patient-care vicinities of healthcare facilities
- Protection against overheating, overcurrent and overcharging
- Integrated mounting tab allows for optional permanent installation on an outlet wall plate for compliance and security
- For 120V, 50/60 Hz AC input
- 5.2V, 2.5A (13W) DC output

Locking tab mounts to outlet wall plate (optional) for compliance and security

USB Type-A port provides 2.5A of charging power
