Resident safety depends on compliance with regulations that govern the use of power strips in long-term care facilities.

With the adoption of the 2012 edition of the National Fire Protection Association® (NFPA) 101 - Life Safety Code (LSC) and the NFPA 99 - Health Care Facilities Code (HCFC), the Centers for Medicare and Medicaid Services (CMS) now allows power strips in resident rooms of long-term care facilities. This includes nursing-home and assisted-living-facility rooms that do not use line-operated electrical appliances for diagnostic, treatment or monitoring purposes (patient care vicinities).

Our products include hospital-grade plugs and outlets that meet UL 1449 (3rd Ed.) and UL 1363 standards and are now allowed by CMS. These surge protectors and power strips are ideal for use with lamps, phone chargers, radios, TVs, stereos, PCs, printers and video game systems.

Hospital-grade solutions are suitable for use outside patient care vicinities. Certifications vary by model. Go to www.tripplite.com for more information, including weights, dimensions and updates.

If you don’t see what you’re looking for, visit www.tripplite.com for over 200 other power strips that meet UL 1363 standards.

For solutions approved for use in patient care vicinities, please see other side.
On July 5, 2016, CMS adopted by regulation the 2012 edition of the LSC and NFPA 99. These regulations allow the use of power strips in patient care vicinities in new and existing healthcare facilities, if the provider/supplier meets all of the listed requirements.

As the leader in healthcare power solutions, Tripp Lite provides products that meet or exceed the requirements outlined in the 2012 edition of the LSC and NFPA 99.

</table>
| All models have nominal 120V input/output, hospital-grade plug and hospital-grade outlets. Agency approved to UL standard shown; additional certifications vary by model. (1) Meets the standards of a medical device when installed properly. (2) Coiled cord. (3) Also suitable for use in other areas outside patient care vicinities. (4) Right-angle plug. (5) The models listed here are suggestions. Any hospital-grade solution in this flyer can be used in Administrative Areas.
