UL Certified Carts Support Large Displays for Convenient Messaging

- **Heavy-duty carts support large screens up to 70 or 120 inches**
- **Carts have UL/cUL 1678 safety certification**
- **Handles feature antimicrobial protection**

CHICAGO ... Power management company Eaton announced today its Tripp Lite by Eaton business has introduced a convenient way to bring messaging to an audience while promoting a safer, cleaner and healthier environment for working and learning.

The new heavy-duty mobile carts accommodate TVs, monitors, digital whiteboards and interactive touchscreens up to 120 inches and are certified to meet UL/cUL 1678 safety standards. As a part of the Safe-IT™ collection of antimicrobial products, the carts have antimicrobial handles that help resist the growth of bacteria, viruses, fungi, mold and mildew. This antimicrobial protection promotes cleanliness in settings where the carts are shared, including healthcare facilities, office buildings and schools.

There are two Safe-IT heavy-duty carts:

- [Cart for 37- to 70-inch displays](#) (DMCS3770AMUL) has a maximum weight capacity of 154 pounds and supports portrait and landscape viewing.
- [Cart for 70- to 120-inch displays](#) (DMCS70120AMUL) has a maximum weight capacity of 264 pounds and supports landscape viewing.

The display height is adjustable, and convenient markings on the carts indicate the distance from the floor to the center of the screen. Tilt adjustments help reduce glare. To accommodate peripherals, the carts have an upper shelf for a webcam or small projector and

a lower shelf for a laptop or audio/video equipment. Cable covers provide an uncluttered, professional look.

"Bringing your message to your audience is vital in every industry," said Karenann Brow, Director of Product Marketing for Surge, Power Strips and Display Mounts. "The new heavy-duty carts accommodate large displays, including interactive touchscreens, and provide a way to move them safely and conveniently. The UL certification and antimicrobial protection promote safety, cleanliness and peace of mind."

Key Features of Safe-IT Heavy-Duty Mobile Carts with UL Certification and Antimicrobial Protection
