

Eaton 5P 850VA 600W 230V Line-Interactive UPS, C14 Input, 4 C13 Outlets, True Sine Wave, Cybersecure Network Card Option, 1U

MODEL NUMBER: 5P850GR

Provides enterprise-class battery backup and pure sine wave output for servers, switches, data storage and other critical networking equipment.

Features

850VA/600W/230V Battery Backup for Network Closets and Small Data Centers

This 5P rack-mount line-interactive UPS system provides reliable battery backup for small business, education, retail, financial or healthcare networking components, including servers, VoIP phones, data storage and PoE switches. The 5P850GR protects connected devices by providing 20 percent more wattage compared to traditional UPS systems.

Reliable Battery Backup Keeps You Operational Through Power Outages

Valve regulated lead acid (VRLA) battery modules allow you to work through short power failures and give you enough time to safely save files and shut down your system in case of a prolonged blackout. Exclusive ABM technology increases battery life by 50 percent and closely monitors battery health to provide advanced notice when batteries need replacing.

Optional Gigabit Network Interface Offers 24/7 Remote Access

The NETWORK-M2 Gigabit network card (sold separately) enables full remote configuration and management, including load shedding, reboots of connected equipment and safe shutdowns. UPS firmware can also be flashed remotely through the NETWORK-M2 without dropping the load, so you don't have to plan for downtime. The card meets both UL 2900-1 and IEC 62443-4-2 standards for cybersecurity, which were developed to address the vulnerability of connected devices to known malware/exploits and to protect business from these risks. An optional Environmental Monitoring Probe Gen 2 (EMPDT1H1C2, sold separately) provides a variety of environmental monitoring capabilities, including temperature and humidity conditions.

C13 Outlets Protect Your Connected Components

Four managed C13 outlets provide connected equipment with pure sine wave AC output and allow you to monitor power consumption down to the outlet group level. Two outlets are grouped into two load banks that let you shed non-critical loads to extend runtime for critical loads.

LCD Interface Keeps You Informed at a Glance

The five-button graphical LCD provides useful information about the UPS itself, load status, events, measurements and settings. To save energy, the LCD switches to the screen saver after five minutes of inactivity. The backlight LCD automatically dims after 10 minutes of inactivity.

Highlights

- Keeps equipment running during outages to allow time for file saves and safe shutdown
- Provides 20% more wattage compared to traditional UPS systems to protect devices
- Exclusive ABM technology with 3-stage charging increases internal battery life by 50%
- 5-button graphical LCD offers critical UPS data and load status at a glance
- Optional NETWORK-M2 Gigabit network card enables full remote access and control

Package Includes

- 850VA 600W 230V 5P Line-Interactive UPS with 4 Outlets
- USB cable
- RS-232 cable
- (2) IEC to IEC jumper cables
- · 4-outlet cable locking system
- Mounting hardware
- Quick Start Guide

Advanced Communications Ports Allow for Automatic Saves and Shutdowns

RS-232 and USB ports connect to a serial-enabled or USB-enabled device for a variety of communication options (cables are included). The RPO/ROO connector permits emergency shutdown or remote restart of all connected equipment. By adding the optional RELAY-MS interface card (sold separately), a dry-contact relay port can be programmed through the LCD to provide reliable communications to automation and industrial components.

Easy Installation Options

You can mount the 5P850GR in just 1U of space in an EIA-standard 19-inch rack using the included 4-post rail kit or an optional 2-post rail kit (RK2PA, sold separately). You can also use the included hardware for wall mounting. The C14 inlet accepts a detachable power cord that connects to a compatible AC outlet.
