

SUN Server Interface Module for NetDirector Matrix KVM Switches

MODEL NUMBER: **B054-001-SUN**

Description

Tripp Lite's SUN Server Interface Module connects to the USB and HD15 ports on a SUN Server, and converts them to a single RJ45 connector. Unit is specifically designed for SUN Keyboard signals. Ordinary Cat5e patch cables can then be used to connect the server to the switch ports on a Tripp Lite B060-016-2 NetDirector Matrix KVM switch. Use of Cat5e cables frees up space in the server cabinet that would be filled by traditional, thicker KVM cables. Compliant with the Federal Trade Agreements Act (TAA) for GSA Schedule purchases

Features

- Eliminates the need for thicker, heavier KVM cables
- Compact, lightweight design
- Plug and Play; no software required
- No power supply required
- Allows a Server/CPU to be located up to 500ft away from the KVM switch
- Compliant with the Federal Trade Agreements Act (TAA) for GSA Schedule purchases

Specifications

OVERVIEW	
UPC Code	037332124227
Technology	Cat5/5e
PHYSICAL	

Highlights

- Needed to connect a SUN computer/server to B060-016-2 NetDirector Matrix KVM switch via Cat5e cable
- Easy to install; no software needed
