

KVM Switch Accessories - USB Server Interface Module for NetDirector Matrix KVM Switches

MODEL NUMBER: **B054-001-USB**

Description

Tripp Lite's USB Server Interface Module connects to the HD15 port and USB port on a computer/server, and converts them to a single RJ45 connector. Ordinary Cat5e patch cables can then be used to connect the server to the switch ports on the Tripp Lite B060-Series NetDirector Matrix KVM switch. Use of Cat5e cables frees up space in the server cabinet that would be filled by traditional, thicker KVM cables.

Features

- Eliminates the need for thicker, heavier KVM cables
- Compact, lightweight design
- Plug and Play; no software required
- No power supply required
- Allows a Server/CPU to be located up to 500ft away from the KVM switch
- Compliant with the Federal Trade Agreements Act (TAA) for GSA Schedule purchases

Specifications

OVERVIEW	
UPC Code	037332123022
Accessory Type	Server Interface Unit
Accessory Class	KVM Switch Accessories
CONNECTIONS	
Side B - Connector 1	HD15 (MALE)
