

1 x 2 HDMI over Cat5/6 Extender Kit, Box-Style Transmitter/Receiver for Video/Audio, Up to 150 ft. (45 m), TAA

MODEL NUMBER: B126-2A1

Transmitter and receiver work in tandem to extend an HDMI signal via a single Cat5e/6 cable to 2 projectors, monitors or televisions. Ideal for digital signs, schools and trade show presentations.

Description

The B126-2A1 HDMI over Cat5/Cat6 Extender Kit includes a transmitter unit and a receiver unit that work in tandem to extend an HDMI signal to two projectors, monitors or televisions. The kit is ideal for digital signs, trade shows, presentations, classrooms, churches, retail settings and other applications where the video source is located farther than conventional cables allow or that require multiple displays connected to one source.

HDMI cable (see the P568-Series) connects the local monitor and the audio/video source to the transmitter's HDMI ports and two monitors to the receiver. Cat5e/6 cable (for best results, use 24 AWG solid-wire Cat5e/6 cable, such as the N202-Series) connects the two units.

The B126-2A1 can extend a 1080i (60 Hz) signal up to 200 feet (61 meters), a 1080p (60 Hz) signal up to 150 feet (45.7 meters) and a 3D signal up to 125 feet (38.1 meters). You can connect up to three B126-110 remote repeaters in the chain for a maximum of six HDMI displays and full signal extension of 700 feet (213 meters) (1080i), 500 feet (152 meters) (1080p) or 400 feet (122 meters) (3D).

In addition to crystal-clear video, the B126-2A1 delivers full, rich stereo and 7.1-channel surround sound (multi-channel or PCM) audio. Built-in equalization control lets you fine-tune the image quality at each remote display. Supports 24-bit True Color (8 bits per channel) and HDCP compatibility. Easy to set up with no software or drivers to install. Mounts to a wall, rack or pole using the included hardware.
