Features

HDMI Extender Receiver Recommended for Digital Signage in Schools and Businesses

This 4K receiver is recommended for video presentations in conference rooms, schools, trade shows, meeting facilities, houses of worship, retail settings, hotels and other digital signage applications where the source and display are farther apart than conventional A/V cables allow. When connected to a B127U-Series transmitter, the B127U-110-PH helps extend 4K signals from an HDMI or DisplayPort source to an HDMI monitor up to 230 feet (70.1 meters) away with zero latency via user-supplied Cat6 cabling. The one-foot pigtail design makes the receiver easy to install, especially in a tight space.

Transmits 4K Video with Multi-Channel Audio, HDR and 4:4:4 Color

The B127U-110-PH supports Ultra HD resolutions up to 3840 x 2160 (4K x 2K) at 60 Hz with uncompressed DTS-HD, Dolby TrueHD and 7.1-channel digital audio. High Dynamic Range (HDR) provides a wide range of vibrant colors with richer contrast, brighter whites and deeper blacks that pop on your 4K display. HDCP 2.2 compliance allows you to stream 4K content with no complications. This receiver also supports 4:4:4 chroma subsampling for top-level PC gaming or using your HDTV as a PC monitor.

Create Daisy-Chain Installations with HDMI Outputs, DisplayPort Outputs or Both

The B127U-110-PH can be connected to additional B127U-110-PH HDMI receivers or B127U-110-PD DisplayPort receivers (sold separately) in a four-link daisy-chain installation. Each additional receiver adds up to 230 feet (70.1 meters) to the maximum video transmission distance and up to a total of 920 feet (280 meters) for the entire installation. **Note**: *See the installation diagram in the owner's manual for more information.*

Multi-Resolution Support Allows Mixing and Matching of Displays of Different Resolutions

The B127U-110-PH is backward compatible with 4K/30 Hz and 1080p resolutions via automatic switching, allowing each connected monitor to display video at its maximum resolution without affecting the other outputs.

Plug-and-Play Operation for Quick Setup and Immediate Use

The receiver works right out of the box with no software required. A one-foot USB-A pigtail connector is the primary power source. Plug the USB connector on the receiver into a USB-A power adapter (such as U280-W01-QC3-1, sold separately) or USB-A port on the connected display. User-supplied 24 AWG Cat6 cabling connects the transmitter and receivers. **Note**: *The receiver can also be powered through its Micro-USB port.*

TAA-Compliant for GSA Schedule Purchases

The B127U-110-PH is compliant with the Federal Trade Agreements Act (TAA), which makes it eligible for GSA (General Services Administration) Schedule and other federal procurement contracts.
