

3-Phase Managed Rack PDU G4, 208V, 42 Outlets, 24A, 8.6kW, L15-30 Input, 10 ft. Cord, 0U Vertical

MODEL NUMBER: EVMA1530X

Managed PDU with enhanced cybersecurity and global approval is ideal for data center managers seeking to streamline PDU procurement and management.

Features

Three-Phase Managed PDU Ideal for Data Center Managers with Large-Scale Distributed IT

The EVMA1530X Rack PDU G4 is ideal for streamlining PDU procurement and deployment within a 42U rack in an enterprise data center, colocation data center or distributed IT infrastructure. Equipped to meet even the most diverse data center rack power needs, the EVMA1530X delivers versatile, enterprise-quality power distribution.

Market-Leading Cybersecurity Ensures Your Data Is Kept Safe

Chain-of-trust encryption and secure firmware boot capability prevent the EVMA1530X PDU from being a cyberattack vulnerability point on a network. An embedded, hot-swappable gigabit network module (GNM) offers enhanced management and cybersecurity, including zero-trust architecture and zero-touch provisioning. The EVMA1530X is compatible with select Eaton Brightlayer Data Centers suite software solutions that enable extensive automation and remote management to shorten response times to power issues and ensure timely updates for stronger cybersecurity.

Remote Management Saves Time and Money

The GNM with multi-color screen supports performance management software for real-time reports, trend charts, dashboards and alerts that are prioritized by severity, as well as remote troubleshooting and automated responses during power events. The EVMA1530X is compatible with optional environmental sensors (sold separately) that provide alerts about temperature, humidity and dry-contact device connections.

42 Outlets Give You Plenty of Power Options

The EVMA1530X features 24 C13 outlets, which accept C14 connectors, and 18 high-retention C39 combo outlets, which accept both C14 and C20 connectors, adding flexibility to deployments and reducing the quantity of PDUs you will need to purchase and install.

Outlet-Level Control Boosts Performance and Efficiency

All 42 outlets provide metering, monitoring and switching for granular power data and precision control of power delivery. The outlets are evenly distributed into six color-coded load banks to improve load balancing and organize connections in a crowded rack.

Convenient Box-to-Rack Installation

Highlights

- Embedded gigabit network module offers market-leading cybersecurity
- 42 outlets include 24 C13 and 18 universal C39, which accepts C14 and C20 plugs
- Power metering, monitoring and switching available at the outlet level
- Toolless mounting buttons allow 0U vertical installation in your 42U rack

Package Includes

EVMA1530X 3-Phase Managed Rack PDU G4

This EVMA1530X rack PDU (rPDU) features toolless mounting buttons that allow front- or side-facing rack installation, depending on your rack's layout and your power needs. The 10-foot power cord with L15-30 input connects to a compatible AC source. Low-profile circuit breakers are flush with the lightweight aluminum chassis, and the narrow two-inch width saves space within the rack for revenue-generating equipment. You can cascade up to 40 EVMA1530X models with each model maintaining its own individual IP address from a single network connection point.

Specifications

OVERVIEW		
UPC Code	786689787653	
PDU Type	Managed	
INPUT		
Input Phase	3-Phase	
PDU Input Voltage	208V	
Nominal Input Voltage Description	3P: 208V	
Recommended Electrical Service	Three-phase 208V service	
Maximum Input Amps	30.0	
Input Connection Type	NEMA L15-30P	
PDU Plug Type	NEMA L15-30P	
Voltage Compatibility (VAC)	208; 3-Phase	
Input Plug Type	NEMA L15-30P	
Input Cord Details	NEMA L15-30P	
Input Cord Length (ft.)	10	
Input Cord Length (m)	3.05	
ОИТРИТ		
Output Capacity (kVA)	8.6	
Output Capacity (Watts)	8600	
Output Capacity (kW)	8.6	
Output Capacity Details	8.6kW (208V) total capacity; 24A max per output phase	
Frequency Compatibility	50 / 60 Hz	
Output Circuit Breakers	(3) low-profile circuit breakers. 20A (US). One circuit breaker per two outlet banks.	
Nominal Output Voltage(s) Supported	208V	
Output Receptacles	(24) C13; (18) C39	
CONNECTIONS		
Ethernet Interface	Yes
