

Fiber Splice Horizontal Enclosure - 4 Splicing Trays, 96 Fiber Capacity, IP68 Rated

MODEL NUMBER: N600H-0096-4

Allows convenient outdoor connection of fiber cables and protects them from the elements in a large broadband deployment.

Features

Provides Durable, Customizable Protection for Outdoor Fiber Cable Runs

This fiber splicing horizontal enclosure comes with four splice trays that accommodate up to 24 unterminated cables each to give you more flexibility in adjusting cable lengths and connection types directly on-site. The N600H-0096-4 is ideal for singlemode and multimode fiber infrastructure in municipal broadband installations, including residential (Fiber to the Home or FTTH) and commercial (Fiber to the Premise or FTTP). This also includes underground fiber runs and those spanning utility poles.

Flexible Connections in Your Fiber Network

By accommodating and protecting 96 splicing connections, the N600H-0096-4 provides a high level of scalability in your network design. The enclosure supports up to four cable entry passthroughs to support a variety of cable runs. Each hinged fiber splice tray allows access to internal cabling without having to remove other trays, making on-going re-entry and re-use convenient.

IP68 Rating Denotes Resistance to Dust and Water

The N600H-0096-4's IP68 rating means the enclosure is 100% protected against dust and able to endure immersion in 1.5 meters of water for up to 60 minutes with no damage or decline in performance.

Cable Management That's User Friendly

Built-in labels log which fiber is spliced to each of the 12 main MPO cable colors. Integrated cable ties keep cables well organized and secure. Included tubing protects each splice point.

A Great Variety of Installation Choices

Operating temperature range from -49°F to 149°F (-45°C to 65°C) supports safe installation in a wide range of outdoor climates. It can be installed on a pole, on a wall, on overhead telco lines or underground.
