PDU Power Cord, C13 to P-Lock C14 - Heavy-Duty, 15A, 250V, 14 AWG, 10 ft. (3.1 m), Black

MODEL NUMBER: **P005-E10**

Connects a computer, server or switch to a PDU with a P-Lock C13 or C39 power connector and extends your existing power connection by 10 ft.

Features

C13-to-C14 Power Cable for Network Devices That Require a Heavy-Gauge Connection
This power extension cord features 14 AWG wire suitable for high power connections, making it a reliable solution for large server applications that require a higher-rated, heavier-gauge cable. The P005-E10 can be used to power a computer, server, switch or other device commonly found in a small data center, office workstation or other lower-amp application. The 10-foot (3.1-meter) length helps reduce cable clutter by providing a tailor-made fit between the device and the PDU in a crowded rack enclosure.

Forms a Special Locking Connection with a P-Lock Outlet
The P-Lock C14 connector forms a secure connection with a PDU with a P-Lock outlet, including Eaton G4 and newer PDUs with C13 and C39 outlets. The P-Lock connection helps reduce costly downtime caused by accidental cable disconnections in a crowded rack or PDU space. The P005-E10 lets you replace a non-locking C14/C13 cable or upgrade an entire PDU application by pairing with an Eaton PDU or other PDU with P-Lock outlets.
