3.5 mm Audio The 3.5 mm stereo cable connects external multimedia speakers, a microphone or headphones and share them between computers.
Quality Construction Provides Superior Signal Transfer Integral strain relief gives the cables extra flexibility, reduces stress, and helps the cables move freely without cracking or breaking loose from the connectors. Foil and braid shielding delivers reliable, error-free signal quality and protection from EMI/RFI line noise that can distort or destroy data. Molded gold-plated connectors with gold-plated contacts provide maximum conductivity and minimum data loss to guarantee a clear transmission free of interference.
