10kW 3-Phase Switched PDU, LX Interface, 208/240V Outlets (24 C13/6 C19), LCD, NEMA L21-30P, 1.8m/6 ft. Cord, 0U 1.8m/70 in. Height, TAA

MODEL NUMBER: PDU3EVSR6L2130

10kW 3-phase PDU with multi-function touchscreen LCD distributes, monitors and manages AC power in an IT or industrial environment. Built-in network interface monitors load levels to prevent overloads that cause downtime.

Description

The PDU3EVSR6L2130 10kW 3-Phase Switched Power Distribution Unit provides advanced network control and remote power monitoring with the ability to turn on, turn off, reboot or lock out power to each outlet. Recommended for any IT or industrial application, it features 30 switched outlets (24 C13 and 6 C19) with included plug-lock insert sleeves to prevent cables from becoming accidentally disconnected. A six-foot cord with NEMA L21-30P plug connects the PDU to a compatible AC power source, generator or protected UPS.

The built-in Java-free HTML5-based LX Platform network interface enables full remote access for PDU status monitoring and email notifications via secure web browser, SNMP, telnet or SSH. It supports 10/100 Mbps auto-sensing for optimum communication with an Ethernet network. Optional EnviroSense2 modules (sold separately) provide a variety of environmental monitoring capabilities. Protocols supported include HTTP, HTTPS, SMTP, SNMPv1, SNMPv2, SNMPv3, telnet, SSH, FTP, DHCP and NTP.

A color touchscreen LCD lets you toggle between menus to monitor input and output current levels, as well as environmental sensor data and network information. It also generates a unique QR code to allow access to the switchable PDU through a mobile device.

The 0U PDU mounts vertically in racks using the included toolless mounting buttons or the included rack-mounting brackets. Use the included PDUMVROTATEBRKT kit to install the unit with outlets facing the rear for better airflow or equipment access.

Highlights

- 10kW 208/240V 3-phase switched 0U PDU
- 30 individually controllable outlets—24 C13, 6 C19
- Built-in LX Platform interface for remote access
- NEMA L21-30P input with 6 ft. AC power cord
- Touchscreen LCD with mobile access option via QR code
- To enable the Auto Probe feature, this product requires LX firmware update 15.5.2 or later to be installed

Package Includes

- PDU3EVSR6L2130 10kW 3-Phase Switched PDU
- Built-in LX Platform interface
- Configuration cable
- (30) Plug-lock insert sleeves
- Rack-mounting hardware
- PDUMVROTATEBRKT mounting bracket accessory
- Owner’s manual
Features

Distributes, Monitors and Manages Network-Grade AC Power

- 10kW 208/240V switched PDU with 3-phase input Recommended for network applications requiring individual outlet control, load shedding and remote monitoring of critical network components
- NEMA L21-30P plug with 6 ft. cord connects to compatible AC power source
- Firmware upgrades support future product enhancements

- 30 Switched Outlets Distribute AC Power
  - 24 C13 and 6 C19 outlets split into 3 separately breakered load banks
  - Individual outlets can be remotely controlled to power up, power down, reboot or lock out devices
- Plug-lock insert sleeves prevent cables from becoming accidentally disconnected

Color Touchscreen LCD

- Reports network data, including IP address, input current level per phase, and output current per load bank and per outlet with ±1% billing-grade accuracy
- Generates unique QR code for read-only access to PowerAlert® Device Manager via mobile device
- Full access available by logging into PowerAlert Device Manager via browser as user with read/write credentials

Built-In LX Platform Interface

- Allows full remote access for power monitoring with email notifications via secure web browser, SNMP, telnet or SSH
- Supports 10/100 Mbps auto-sensing for communication with an Ethernet network
- Optional EnviroSense2 modules (sold separately) provide a variety of environmental monitoring capabilities
- No Java required

Broad Communications Compatibility

- Supports HTTP, HTTPS, SMTP, SNMPv1, SNMPv2, SNMPv3, telnet, SSH, FTP, DHCP and NTP
- Supports automatic and manual assignment of IP address

Reduce Service Calls with Auto Probe Autonomous Device Management

- The Auto Probe feature (Firmware 15.5.2 and greater) checks the connectivity status of any networked device and automatically takes one or more user-configured actions if the device fails to respond; actions include outlet reboot, set SNMP traps, SNMP OID sets, and even script execution when used in conjunction with the Tripp Lite PowerAlert Network Shutdown Agent (PANSA)

Easy 0U Installation in EIA-Standard 19 in. Racks

- Mounts vertically using included toolless buttons or rack-mounting brackets
- Included PDUMVROTATEBRKT allows mounting with rear-facing outlets

TAA-Compliant

- Compliant with the Federal Trade Agreements Act (TAA) for GSA Schedule purchases

Customized Load Management Receptacles | Each outlet is individually controllable

**USER INTERFACE, ALERTS & CONTROLS**

**Reported Load Segments**

Reports input current per phase (L1, L2, L3), plus output current for each output load bank (20A balanced max per banks B1-B3) and individual output receptacle (1-30); Outlets are color-coded and labeled for phase and load bank identification; L1-L2 feeds light-gray outlets (B1); L2-L3 feeds black outlets (B2); L3-L1 feeds dark-gray outlets (B3)

**Front Panel LCD Display**

Touchscreen LCD reports NETWORK DATA (IP address, Subnet Mask, Gateway, MAC Address, Device Name, Model, Serial Number), INPUT PHASE DATA (Amperage, Wattage, Voltage per phase, plus Unbalance percentage), LOAD BANK DATA (Amperage, Wattage, Voltage per load bank, plus total PDU output in watts), OUTLET DATA (Amperage, Wattage per outlet), CONFIGURATION DATA (Listing of current configuration settings), ENVIRONMENTAL DATA (Reports data and status of E2 sensor modules; Sensor options are available for temperature and humidity, plus input and output dry contacts), MOBILE ACCESS (Generates a unique QR code to view reported PDU details on a mobile device)

**Front Panel LEDs**

One LED for each output receptacle offers power availability information: GREEN (Power ON, load bank capacity <80%), YELLOW (Power ON, load bank capacity >80%), RED (Power OFF/undervoltage), RED FLASHING (Power OFF/breaker trip), LED OFF (Power OFF)

**Switches**

LX Platform Interface: Recessed reset switch for interface reboot and factory reset

**Current Measurement Accuracy** (Amps) +/−1%

**Voltage Measurement Accuracy** (Volts) +/−1%

**Power Measurement Accuracy** (Watts) +/−1%

**PHYSICAL**

**Form Factors Supported**

Vertical rackmount installation supported with included mounting brackets; supports toolless mounting in button-mount compatible racks
