Flap Seal Kit for RapidPod Aisle Containment System - 16' Roll

MODEL NUMBER: RAPODFLAP16

Creates a tight, reliable seal to protect your modular RapidPod Aisle Containment System against dust, moisture and harsh weather.

Features

Modular Customization of Your RapidPod Aisle Containment System

This flap seal kit creates a tight, reliable seal to protect your RapidPod® Aisle Containment System against dust, moisture and harsh weather elements. The flexible sponge rubber helps absorb noise and reduce vibrations. It compresses to create a seal against contaminants and moisture, and maintains its shape and sealing properties even after prolonged periods of compression.

Resists Sunlight, Ozone and Other Weather Threats

Made from EPDM rubber and PVC with an integrated metal wire carrier for a strong grip, the premium rubber seal resists UV light, ozone and water absorption, which helps prevent aging and wear. It also withstands a wide temperature range from -40 degrees to 212 degrees Fahrenheit without losing its flexibility or integrity.

Easy to Install

You can cut the 16-foot roll to any length. The trim design snaps on easily over an edge, allowing for quick and efficient installation. The black rubber edge trim seal also provides a distinguished finished look in your RapidPod Aisle Containment System.

Highlights

- Resists dust, moisture, harsh weather, sunlight, ozone and other contaminants
- Sponge rubber flap compresses to create a tight seal that protects
- Can withstand a wide range of temperatures without losing flexibility or integrity
- Black rubber seal can be cut to any length to easily customize your application
- Trim design allows for efficient installation, snapping easily over an edge

Package Includes

Flap seal, 16 ft. roll
