

2U Rack-Mounting Kit for Select Tripp Lite Series Cloud-Connected UPS Systems

MODEL NUMBER: RKTRYPSC

Attaches to your cloud-connected UPS for mounting in 2U of rack space.

Features

Mounts Your Cloud-Connected UPS System in 2U of Rack Space

The RKTRYPSC lets you install select Tripp Lite series UPS systems in a 2-post or 4-post rack. This shelf-style rack-mounting kit keeps the UPS securely in place with all controls easily accessible and plenty of airflow to keep the unit cool. It's ideal for chain stores, restaurants, edge computer installations and other locations that require the UPS to be rack mounted.

Assembles in Minutes Using the Included Hardware

After assembly, the metal mounting kit attaches to your rack just like a normal rack shelf with user-supplied hardware. The kit can be installed first, and then the UPS slides into place after the RKTRYPSC is secured to the rack. Rear brackets and front rubber spacers keep the UPS in place. The front panel secures the UPS while reinforcing the shelf. **Note:** Before installation, be sure to allow at least two centimeters (0.75 inches) of clearance both above and below the UPS system.

Designed for Select Tripp Lite Series UPS Systems

The RKTRYPSC is compatible with the SMART-PSRTNC Series of cloud-connected UPS systems, including SMART750PSRTNC, SMART1000PSRTNC and SMART1500PSRTNC.

Specifications

OVERVIEW	
UPC Code	037332290526
