

# SmartRack Locking Door Handles for Server Rack Front and Back Doors, 4-Digit Combination Lock, 2 Keys

MODEL NUMBER: SRCOMBO4

Replacement lock handle kit allows facility and IT managers to designate authorized access to rack cabinets.

## Features

### Theft-Deterrent Replacement Handle Prevents Unauthorized Access to Your Rack Cabinet

This SmartRack replacement lock handle kit helps you securely store your valuable rack-mounted equipment to protect it from damage, tampering or theft. It's recommended for data centers, server rooms or network closets where you need your floor-standing rack enclosures to be protected from unauthorized access. It's also ideal security for colocation racks in which cabinets are assigned to multiple tenants.

### Swing Handles Come with 4-Digit Combo Lock

The SRCOMBO4 fits SmartRack enclosure door assemblies equipped with handles. Replacement swing handles for front and rear doors are included. They replace the rack cabinet's existing door handles using the included mounting hardware. The four-digit combination lock with up to 10,000 different combinations can be easily reset and changed as often as you want. Bypass keys are also included for facility and IT managers who require access.

## Specifications

| OVERVIEW                        |                                    |
