

## Wire Mesh Cable Tray - 300 x 100 x 3000 mm (12 in. x 4 in. x 10 ft.), 6 Pack

MODEL NUMBER: SRWB12410STR6

Provides wall-, floor- or ceiling-based copper cable routing, allowing organized category cable bundling within your data center.

### Features

**Eliminate Cable Stress by Organizing Copper Cabling Through Your Data Center** This SmartRack® Wire Mesh Cable Tray is easy to install along the wall, floor or ceiling of your data center. The SRWB12410STR6 is a straight section measuring 3000 millimeters long, but you can cut it with side-action bolt cutters to fit your custom specifications. It also measures 300 millimeters wide and 100 millimeters high to allow you to neatly bundle network and audio/video cables.

**Constructed from High-Strength Steel Wire Built to Last in Busy Environments** The black powder-coated wire is smooth and rounded, which not only protects cable installers and IT personnel from cutting their hands, but also prevents cables from fraying along sharp edges. The rounded wire also prohibits debris from building up on it in dusty network closets and industrial spaces. Large mesh openings allow you to route cables through the spaces if needed.

**Designed to Give You Great Flexibility in Installation, Transportation and Storage** The SRWB12410STR6 is ideal for data centers, network closets and some industrial areas in a wide variety of applications, including office buildings, shopping centers, schools, hotels, hospitals, restaurants and transportation centers. Each tray can be stacked with another to save space during transportation or storage.

## Specifications
