

L Coupler Kit for Wire Mesh Cable Trays

MODEL NUMBER: SRWBLCPLR

Safely and securely connects sections of wire mesh cable tray in an L- or T-shaped intersection in your data center or network closet.

Features

High-Resiliency Connecting Bar Helps You Create Custom Bends and Junctions

The SmartRack® SRWBLCPLR includes a black powder-coated metal L-shaped connecting bar and two couplers, each with an M6 flange nut and M6 x 20 carriage bolt for easy installation with your wire mesh cable tray. By creating a secure connection point between two intersecting sections of cable tray in your server room or data center, you can create L- or T-shaped intersections that guide the direction of cabling to your liking. For best practices, attaching each L connector with four couplers (such as those included with Tripp Lite's SRWBUNVCPLR Coupler Kit) is recommended.

Highlights

- Securely connects wire mesh cable tray sections in ceiling, floor and wall installations
- Allows you more flexibility in routing custom cable management applications
- Includes 2 couplers, each with a mounting nut and bolt for quick installation

Applications

- Organize a wire mesh cable tray system with intersecting sections along the wall, floor or ceiling of your data center

System Requirements

Two separate SRWB sectional pieces

Package Includes

- L connector
- (2) Couplers
- (2) M6 flange nuts
- (2) M6 x 20 carriage bolts
- Installation guide
