SmartOnline 5000VA 4500W 120/208V Online Double-Conversion UPS with Stepdown Transformer - 18 5-20R, 2 L6-20R and 1 L6-30R Outlets, L6-30P Input, Cybersecure Network Card Included, Extended Run, 6U

MODEL NUMBER: SU5000RTF

Provides sine wave output, complete battery backup and power protection for mission-critical IT installations, edge networks and other advanced network applications.

Features
5kVA/4.5kW/208V Battery Backup for IT Installations and Edge Networks
This SmartOnline® rack-mount online double-conversion UPS system provides uninterrupted battery backup and AC power protection against blackouts, brownouts, surges and line noise that can damage valuable IT equipment or destroy data. An included stepdown transformer converts your UPS, utility or generator’s 208V high-voltage input to 120V low-voltage output to allow connection of a wider range of components.

Expandable Internal Battery Backup Keeps You Operational Through Power Outages
The field-replaceable, hot-swappable valve regulated lead acid (VRLA) battery modules allow you to work through short power failures and give you enough time to safely save files and shut down your system in case of a prolonged blackout. Automatic restart after power outages reduces costly on-site visits. You can also connect up to four extended battery modules (BP180RT, sold separately) for hours of extended runtime.

Pre-Installed Network Interface Offers 24/7 Remote Access
The WEBCARDLXE network interface turns the SU5000RTF into a managed device on your network. It enables full remote configuration and SNMP-based UPS management, including load shedding, safe shutdowns and automated alerts. The IP-based Auto Probe feature ensures continuous network uptime by communicating with other network devices, detecting lost connectivity and automatically rebooting IT equipment without an on-site visit. Optional EnviroSense2 modules (E2MT, E2MTDO and E2MTHDI, all sold separately) provide a variety of environmental monitoring and control options.

NEMA Outlets Protect Your Connected Components
One L6-30R, two L6-20R and 18 5-20R managed outlets provide connected equipment with pure sine wave AC output and allow you to manage power consumption down to the outlet group level. Power provided by these outlets is filtered to protect connected equipment against damaging surges and line noise. The SU5000RTF also supports hardwired output.
Intuitive LCD Interface Keeps You Informed at a Glance
The menu-driven LCD provides control settings and critical information to help diagnose any issues, including alarm and fault notifications. The interface rotates to accommodate both rack-mount and tower configurations, and it tilts up to 45 degrees for more comfortable viewing.

Advanced Communications Ports Allow for Automatic Saves and Shutdowns
RS-232 and USB ports connect to a serial-enabled device for a variety of communication options (cables are included). A dry-contact relay port can be programmed through the LCD to provide reliable communications to automation and industrial components. The RPO/ROO connectors permit emergency shutdown or remote restart of all connected equipment.

Versatile Installation Options
You can mount the SU5000RTF in just 6U of space in an EIA-standard 19-inch rack using the included 4-post rail kit or an optional 2-post rail kit (RK2PC, sold separately, one each required for each UPS, EBM or transformer). You can also adapt it for tower installation using the included support stands. The 10-foot power cord with NEMA L6-30P plug connects to a compatible AC outlet. A cable gland is included for alternate hardwire input.

### LINE / BATTERY TRANSFER

| Transfer Time | No transfer time (0 ms.) in online, double-conversion mode |
| Low Voltage Transfer to Battery Power (Setpoint) | 176V |
| High Voltage Transfer to Battery Power (Setpoint) | 276V |

### FEATURES & SPECIFICATIONS

| Cold Start (Startup in Battery Mode During a Power Failure) | Cold-start operation supported |
| High Availability UPS Features | Automatic Voltage Regulation (AVR); Expandable battery backup; Hot swappable batteries; On-Line/Double-Conversion; Pure sine wave output; Remote management; Surge/noise protection; Zero transfer time |
| Green Energy-Saving Features | High efficiency economy mode operation |

### APPLICATIONS

| UPS Applications | Mission Critical Applications |

### STANDARDS & COMPLIANCE

| Product Certifications | NOM (Mexico); cUL Listed; EN 62040-2 |
| Product Compliance | FCC Part 15 Class A (USA); CE (Europe); FCC (USA); ENERGY STAR Qualified; RoHS |
