## 6-Outlet Surge Protector with USB-C Safeguards Your Sensitive Electronics

Ideal for your home, office, retail or industrial workstation, this Protect It!® surge protector features a surge protection rating of 900 joules to defend your valuable electronic components against power surges and spikes. Because residential power outlets have three wires—hot line (H), neutral (N) and ground (G)—the TLP610U30CLAMPB protects all three, covering the two protection modes: full normal mode (H-N) and common mode (N-G/H-G).

#### NEMA 5-15R Outlets Accept a Wide Range of Electronic Devices

Plug your computer, printer, router, desk lamp or other home/office electronics into six NEMA 5-15R outlets to protect them against dangerous surges, spikes and line noise. One outlet is separated from the others to allow connection of a bulky transformer without blocking adjacent outlets.

#### USB-C Ports Support up to 30W for Rapid Charging

Two USB-C ports share Power Delivery (PD) charging output up to 30W, which is sufficient for fastcharging and powering smartphones, tablets and other mobile devices.

#### Premium Protection from EMI/RFI Line Noise Helps Your Equipment Perform Better

This surge protector filters out disruptive EMI (electromagnetic interference) and RFI (radio frequency interference) line noise that can disturb your electronics and inflict hardware damage or data loss. This EMI/RFI filtering also helps your connected components perform better and last longer.

## **Clamps Firmly to Your Workstation for Easy Access**

The TLP610U30CLAMPB features an adjustable mounting clamp, which attaches to a desk, table or other flat surface from .04 to 2.2 inches (1 to 56 millimeters). The 10-foot (3-meter) braided input cord with NEMA 5-15P right-angle plug allows you some flexibility in placing the surge suppressor away from the nearest wall outlet.
