

## USB-C Multiport Adapter - 4K 60 Hz HDMI, USB-A and USB-C Hub Ports, USB 3.2 Gen 1, 140W PD Charging, HDR, HDCP 2.3

MODEL NUMBER: U444-06N-H4U-C3

Adds 4K HDMI, USB hub ports and USB-C PD charging to the USB-C port on your MacBook or Windows laptop.

### Features

#### USB-C Adapter Turns Your USB-C or Thunderbolt 3 Device into a Multiport Workstation

This versatile 4K adapter adds multiple ports to the USB-C or Thunderbolt 3 port on your MacBook Pro or Windows laptop. The U444-06N-H4U-C3 allows you to transmit digital audio and 4K video to a large display, add a thumb drive or other USB peripherals, and power and charge a PD Charging-compliant laptop or notebook. It's an ideal adapter for personal or business workspaces that frequently connect to flash drives and other external data storage.

#### Supports USB-C DisplayPort Alternate Mode for Converting Audio/Video Signals

By connecting the built-in USB-C cable to a source device that supports USB DisplayPort Alt Mode, you can output 4K video and digital audio to an HDMI monitor, television or projector without installing special software drivers.

#### Transmits 4K Video with HDR and 4:4:4 Color

The U444-06N-H4U-C3 supports Ultra HD 4K resolutions up to 4096 x 2160 at 60 Hz. It supports HDR (High Dynamic Range), providing a wide range of vibrant colors with richer contrast, brighter whites and deeper blacks that pop on your 4K display. HDCP 2.3 encryption allows you to stream 4K content with no loss in resolution. This adapter also supports uncompressed 4:4:4 chroma subsampling for top-level PC gaming or using your HDTV as a PC monitor.

#### Connects USB Peripherals and Transfers Data at Fast USB 3.2 Gen 1 Speeds

The USB-A port accepts USB peripherals, such as a flash drive, mouse, keyboard or printer, and supports charging up to 5V 1.5A (7.5W) for mobile devices. The USB 3.2 Gen 1 port transfers data at speeds up to 5 Gbps for quickly transferring large files between the host and external storage drives. **Note:** Host must support USB OTG (On-the-Go).

#### PD 3.1 Charging Port Charges High-Powered Devices via AC Wall Charger

In addition to supporting USB 3.2 Gen 1 data speeds up to 5 Gbps, the USB-C Power Delivery port provides power output up to 28V 5A (140W), which is capable of charging and powering most newer laptops, including the latest MacBook Pro or Windows laptop. Connect the charging port to the device's AC wall charger with a user-supplied USB-C cable rated to 140W charging.

Ready to Use Right from the Package, So You Can Plug and Play Immediately

### Highlights

- Supports UHD resolutions up to 4K @ 60 Hz (4:4:4) with High Dynamic Range (HDR)
- Converts audio/video signals from sources supporting USB-C DisplayPort Alt Mode
- Power Delivery port provides 28V 5A (140W) output for charging connected host device
