

Cordless VoIP Phone (2.4 GHz)

MODEL NUMBER: VP-24A

Description

While most VoIP phones require you to be connected to your PC via a USB cable our Cordless VoIP phone uses a wireless signal that allows you to roam your house or office while using Skype. You may use the phone for both PC-to-PC and PC-to-Phone calling.

Features

- Cordless receiver plugs into the USB port on a PC or Mac
- Phone communicates with the computer over a 2.4 Ghz radio signal that works through walls and furniture
- Calls are made over the PC's internet connection using Skype
- Open and close Skype with a single button on the phone
- The LCD display on the phone shows you who is online, as well as Skype status, battery level, and signal quality.

Highlights

- For PC-to-PC and PC-to-Phone calling
- Cordless convenience
- Rechargeable
