Power protection solutions for critical servers

With the increasing reliance on Internet connectivity within daily business operations, attaining true continuity for critical computing systems is key for IT managers.

Protection from hidden threats, such as momentary power glitches or long-term outages, is of upmost importance. Eaton® power protection, distribution and management solutions give information technology (IT) managers peace of mind that their servers are protected by the best power solutions in the industry.

Solution highlights >

Network managment

- Increased functionality and manageability provide the capability to monitor power in multiple locations from a centralized access point
- Easily identify what servers might be drawing more power with our industry-leading, outlet-level remote monitoring

Virtualization ready

- Eaton's Intelligent Power Manager™ (IPM) software uses a simple dashboard display that seamlessly integrates into VMware® and Citrix® platforms
- This added functionality allows users to easily automate the ability to move, consolidate or suspend virtual machines in the event of a power disruption
- Visit Eaton.com/Virtualization

Battery technology

- Eaton's ABM® battery technology uses sophisticated sensing security
- Extend battery life by up to 50 percent
- Notify users before the battery fails
